Teaching & Learning Fair - Technology Integration (Other)  Abstract 2021-153
Teaching & Learning Fair Presentation  Mode: Synchronous
Session: Teaching & Learning Fair Session 2  Friday June 4, 2021, 2:05 PM - 3:05 PM

In the era of virtual learning, student engagement provides the opportunity of creating a sense of community and comradery in the learning space. Instead of relying on typical discussion board sessions, Padlet provides an interactive opportunity for instructors to utilize virtual bulletin boards to facilitate discussion. For example, students may be responsible for conducting a sport organization mission statement analysis or describing team development in assessing who they believe is the greatest sport team of all time. Padlet allows students to submit photos, GIFs, memes, or videos easily as part of their post to facilitate interaction and comments among students.
